

IMPOSSIBLE IS IMPOSSIBLE. UNTIL IT ISN'T.

At UF Health, we redefine impossible. Just as elite athletes defy expectations, we too embrace a relentless pursuit of excellence. In every heartbeat, in every breath, there is a determined spirit that whispers “more.” It drives champion athletes. It fuels their desire to be the best. To win gold.

That same spirit is found at UF Health — to be the best for our patients. That’s why we are creating Florida’s first network of mobile stroke treatment units, to save time and save lives. And why we don’t just do research, we empower it with one of the fastest supercomputers in academia.

At UF Health, we aim to break the limits set before us, because we know that **human progress has no finish line.**
